Good morning!

When I finished carrying out the technical test, I was left with a bad taste in my mouth. I have done what you have asked me, at first glance it seems that everything is there, but it is not. It is a PHP technical test in which I have not been able to perform correctly the connections of the frontend with the backend, for the reason that I lack more knowledge in the backend and I have not been able to translate my knowledge into the code as requested.

I have set up a frontend with Angular and a mockup, instead of the connection to the database.

The backend is built with Laravel.
I have not been able to make the relationship between the tables right, so I have not made the connection with the front.

Thank you for giving me the opportunity to participate in this selection process.

Have a nice day!

    Sincerely, Ekaterina Adarchenko.
